SKILLS

- HTML
- CSS
- Javascript
- JQuery
- Ajax
- JSON
- Node JS
- Bootstrap
- APIs

PROJECTS

- Recipe Rolodex: A one stop shop for all your recipe needs. This application allows you to search recipes, favorite recipes, create a shopping list, and search recipe videos on YouTube.

Technologies Used:

- Bootstrap (Styling & JavaScript)
- Google Fonts
- YouTube API
- TheMealDB API
- Vanilla CSS, JS, and HTML

Live website: <https://amyventura.github.io/Project1/>

- Weather Dashboard: The project was to create a weather app and use the OpenWeather API (<https://openweathermap.org/api>) to retrieve weather data for cities. Also to use localStorage to store any history of searches. Using three different APIs from OpenWeather I was able to retrieve weather data including current weather, 5 day

forecast, and the UV index of the current day. The UV index value includes a button color according to the UV value.

Technologies Used:

- Vanilla CSS, JS, and HTML
- JQuery
- Bootstrap
- WeatherMap APIs (3)

Live Website: <https://amyventura.github.io/weather-dashboard/>

- **Code Quiz:** A code quiz that asks the user basic questions on coding. It times the user, save their score, initials, and save all of the inputted highscores, then print out a highscore page with all the saved scores.

Technologies used:

- Vanilla CSS, JS, and HTML
- JQuery
- Bootstrap

Live Website: <https://amyventura.github.io/code-quiz/>

EDUCATION

Queens College

Flushing, NY

August 2013-January 2017

- Bachelor of Arts in English
- Double major in Early Childhood Education and English
- GPA 3.3
